# What is CloudFront?

# CloudFront

## What is CloudFront?

- CloudFront is the **Content Delivery Network (CDN)** of AWS.
- Basically, it is a globally distributed network located on different geographical places.

# CloudFront

## What is CloudFront?

- The aim of this service is to **provide faster distribution** to the dynamic or the static web contents.
- World-wide distributed data centers which are called **edge locations** are the backbone of CloudFront.

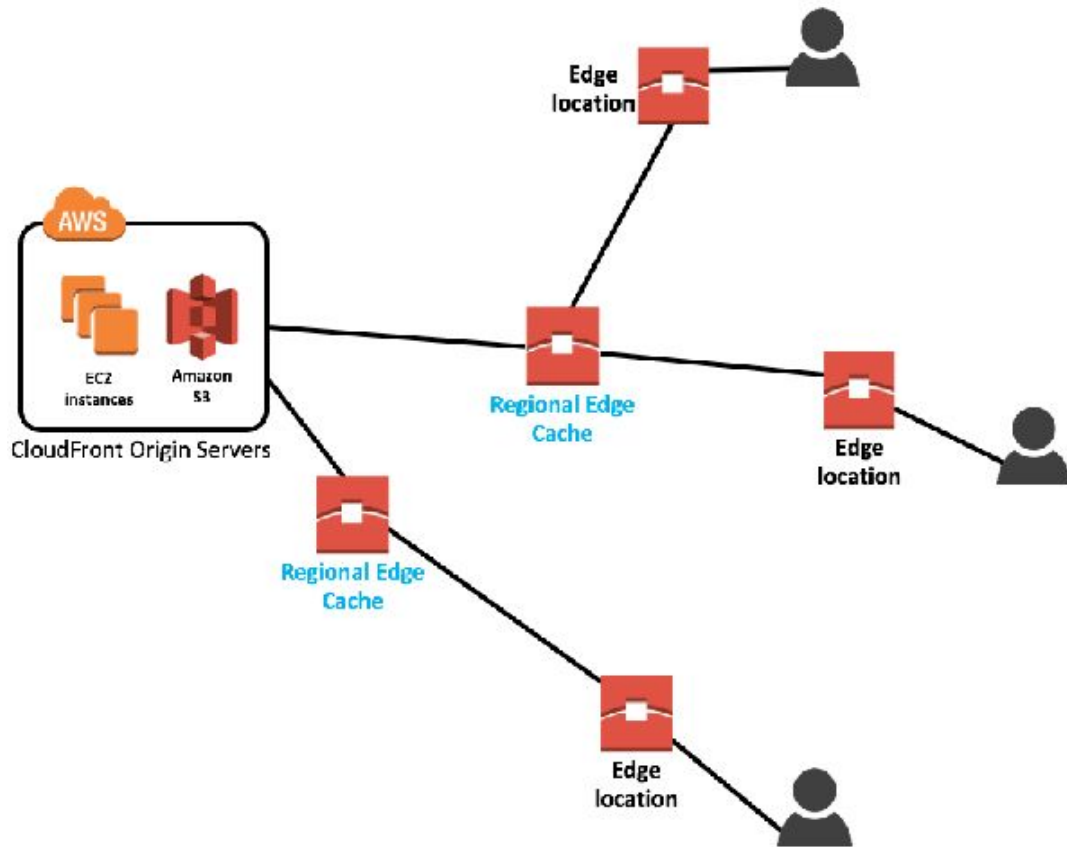

2

# CloudFront Infrastructure

# CloudFront

## CloudFront Infrastructure

- AWS CloudFront has a world-wide network of **310+ Points of Presence (PoP)\***:
  - **300+ Edge Locations**
  - **13 Regional Edge Caches**

\*as of March 2022.

# CloudFront

## CloudFront Infrastructure

- These facilities are spread over 90+ cities across 47 countries\*.

\* March 2022

# CloudFront Pricing

# CloudFront

## Pricing

### Free Tier

*Always free*

**1 TB of data transfer out**  
**10,000,000 HTTP or HTTPS Requests**  
**2,000,000 CloudFront Function Invocations**

*Each month*

### CloudFront Savings Bundle

*Amazon CloudFront charges traffic served based on the following dimensions: The CloudFront Security Savings Bundle is a flexible self-service pricing plan that helps you save up to 30% on your CloudFront bill in exchange for a monthly spend commitment for a one-year term. This savings is not limited to data delivered by CloudFront but applies to all CloudFront usage types, including CloudFront Functions and Lambda@Edge. The CloudFront Security Savings Bundle also includes free AWS Web Application Firewall (WAF) usage up to 10% of your committed amount.*

### Custom Pricing

#### Custom Pricing

*Custom discounted pricing is available for customers willing to commit to a minimum of 10 TB of data transfer per month for 12 months or longer. Discounts vary based on the amount of the commitment. Interested in signing up for discounted pricing?*
